About The Event

ICCIDS 2023, ICCIDS 2022, ICCIDS 2021, ICCIDS 2020 - Proceedings

Theme: AI based Knowledge Discovery and Management

In 2015, the United Nations set several ambitious sustainable development goals to be achieved in the next 15 years to make our world a better place for everyone: end poverty, protect the planet, and ensure prosperity for all. Towards this objective, the Department of Computer Science and Engineering, Sri Sivasubramaniya Nadar College of Engineering is proud to conduct and organize the ICCIDS 2024 - 7th International Conference on Computational Intelligence in Data Science on February 21 - 23, 2024.

The conference provides an opportunity for researchers, engineers, developers, and practitioners from academia and industry to discuss experimental and theoretical work in solving problems to achieve sustainable development goals through Artificial Intelligence (AI).

This conference holds value for anyone with an interest in or involvement with AI and its diverse applications across various domains. It features expert talks provided by individuals from renowned institutions and organizations across the globe, presentations by young researchers. Notably, accepted papers presented at the conference will be incorporated into the conference proceedings and subsequently published as part of the prestigious Springer IFIP AICT (Advances in Information and Communication Technology) series.

Call for Papers

We invite high-quality regular paper submissions with technical research or survey work describing original and unpublished work addressing the theme of the conference. The reviewed, accepted and presented papers will be published in Springer IFIP AICT. The paper should not exceed 15 pages including references. Article must include title, abstract, list of keywords, introduction, related work, proposed methodology, discussion of results, and conclusion with future work. Topics of interest for the conference include, but are not restricted to:

- AI-based Knowledge Discovery and Management
- AI-Enabled knowledge management, framework, and control
- AI-powered Knowledge-as-a-Service (KaaS)
- Predictive Intelligence for Knowledge Management
- Natural Language Processing techniques
- Applications of AI in computer vision
- Speech processing techniques
- ML/DL algorithms in intelligent autonomous systems
- Deep neural networks-based frameworks and algorithms for Energy Efficiency

Authors must adhere to the formatting instructions, utilizing Latex or Word style as specified on the [Author's instruction page](#) for camera-ready papers. Authors are requested to make use of below templates for preparing the manuscript

[LaTeX](#)

[MS-Word](#)

Submission Link: <https://equinocs.springernature.com/service/ICCIDS2024>

At least one author of an accepted paper is required to register for the conference.

A distinguished [Best Paper Award](#) will be presented for each session, recognizing outstanding article quality.
